

CONFIGURATIONS UNLIMITED **PRESSED GLASS PREFORMS**

Electro-Glass Products is pleased to offer the electronics industry a complete line of glass preforms using the pressed powder method. A carefully controlled melting procedure and a **modern spray drying tower** insures consistency of raw materials for pressing.

With a variety of precision equipment, Electro-Glass is capable of producing outside diameters as small as .030" and as large as 4.000", with inside diameters as small as .008".

Tooling can be designed for **special configurations** to fit the customer's individual requirements, which may include flanges, countersunk or counterbored I.D.'s, bosses, channels, and more. The number of

holes possible is limited only by the surface area necessary to arrange them.

High temperature standard sealing glasses and their properties are shown in our yellow Glass Bulletin. Information on many more popular materials is available upon request.

Over the years, Electro-Glass Products has developed a multitude of **customized blends** to meet with the special needs of our customers. If you have special requirements, please contact our Sales Staff. Your inquires will receive our immediate attention.
